

"A drawing says more than a thousand words"

Eric Gouda

I missed submitting the plate that should have accompanied the description of the new species *Tillandsia jacob-bakii* in the *Journal of the Bromeliad Society* issue 72(4): 151-154 (2023), and because a plate says more than a thousand words, it is printed here.

Collation: *Tillandsia jacob-bakii* A. primary bract; B. floral bract; C. sepals; D. petals; E. stamens; F. pistil; G. detail of the anthers and stigma.

Tillandsia jacob-bakii, habit. photo by Eric Gouda, at Corn. Bak BV nursery.
